PROFESSIONAL SUMMARY

Computer Science B.Tech student with hands-on experience building full-stack applications and a solid foundation in Java, C++, data structures, and algorithms. Projects include an HR management system, a responsive portfolio, and a Java library management application. Solved 200+ DSA problems using Java and seeking an entry-level software development opportunity to apply these skills, learn from a team, and contribute to useful software.

PROJECTS

Human Resource Management System (HRMS)

Node.js | Express.js | MongoDB | HTML | CSS | JavaScript | Bootstrap

- Developed a full-stack HRMS with an admin dashboard and modules for employee management, attendance, leave, and payroll.
- Connected the application to MongoDB through REST APIs to support employee and HR records.
- Implemented authentication, an email service, and PDF generation as part of the HR workflow.

GitHub: github.com/vikki9153/HRMS_PROJECT

Personal Portfolio Website

Full-Stack Web Development

- Built a responsive portfolio to present skills, projects, and experience in a clear, accessible format.
- Created an interactive user interface and connected the backend to support dynamic content management.

Live demo: vikki-portfolio-6izh.vercel.app

GitHub: github.com/vikki9153/vikki-portfolio

Library Management System

Java | Object-Oriented Programming | File Handling

- Developed a Java application for managing books and student records, with workflows for issuing and returning books.
- Added record management and file-based data persistence using object-oriented programming concepts.

EDUCATION

Bachelor of Technology in Computer Science

Gopal Narayan Singh University, Jamuhar | Aug 2024 - May 2028 (Expected)

CERTIFICATIONS & ASSESSMENTS

TCS iON NQT - IT Scorecard | Aug 2026

Overall: 58.04% | Advanced Quantitative & Reasoning: 79.00% | Programming Hands-On (Java): 55.87% | Issued: 11 Sep 2026

TECHNICAL SKILLS

Programming Languages: Java, C++, JavaScript, SQL
Web Development: HTML, CSS, Bootstrap, Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL
Developer Tools: Git, GitHub, Postman, Vercel, Render
Computer Science: Data Structures and Algorithms, Object-Oriented Programming, File Handling

ACHIEVEMENTS & ACTIVITIES

- Solved 200+ Data Structures and Algorithms problems using Java on coding platforms; practiced arrays, strings, recursion, linked lists, trees, and algorithms.
- Participated in technical events and hackathons in 2026.

STRENGTHS

Problem Solving | Team Collaboration | Communication | Leadership | Adaptability | Continuous Learning
